

Global search(shows with graphs):

Show all leads
Show all deals
Show all contacts
Show all accounts

Show only a particular column after global search:

Show names column
show phone number column
show phone number and email id columns
Show annual revenue column

Record Navigation:

Show first 5
Show last 5
Show records 10 to 20
Show record 7

Search individual records:

Search for goli sathwik
Search for goli
Search for 1234567890
Search for sathwik@gmail.com

Search multiple records(if multiple records are present, then it will ask us to select a record):

Search for goli
Search for swargam

Filter:(use “where” sometimes)

show leads where company starts with letter g
Show company name where starts with A(it takes active module if you dont mention the module)
filter email contains gmail
show names starts with letter k
Show Revenue greater than 5 lakhs
Show Revenue less than 10 lakhs
Show Revenue between 2 lakhs and 10 lakhs
Show Revenue between 200000 and 1000000
Show Revenue between 2.5 lakh and 8 lakh
Show deals where closing date after 2026-06-01
Show deals where closing date after 7th june 2026

Note: Filtering works with:

- Numeric filters (>, <, >=, <=)
- String filters (contains, starts with, ends with, equals)
- Date filters

Sort:

Sort by Amount
Sort by email
Sort by phone number
Sort by names
Sort by full name
Sort by company
sort by revenue
Sort names in descending
Sort revenue in descending
Sort email in descending

CRUD operations:**Create operations:**

Create a new lead named Rahul Sharma.
Create a lead with first name Rahul, last name Sharma, company ABC Technologies, email rahul@gmail.com, phone 9876543210.
Add a new lead from XYZ Solutions.
Create a contact named John Smith.
Add a contact with email john@gmail.com and phone 9876543210.
Create an account named ABC Technologies.
Create a deal named Website Development.
Create a deal closing on 15 August 2026.
If you want to clear any field while creating we can use query like "clear the first name"

Update operations:

Show all leads> show record 2 > change lead status to connected
Show sathwik details > add more > add the fields or change the fields.
If you ask what are the available options for lead status or deal stages, it will show all lists.

Delete operation:

Select a single record > delete this record.

When the search operation is happening it gave a response in the summary under the name. It is showing a company. If a module does not contain a company, it is returning the user ID and the name in the flower bracket. That should not happen. If the company name is not present then it should return none or it should not return anything. If the company name is present then only it should show in the summary.
